Waterblast Training

***Anybody can buy equipment,
it's your people that make the difference***

Make Your People as Good as Your Machine with FS Solutions Waterblast Skills Classes!

The Fundamentals class covers the basics of how to use a standard waterblaster for the technician (hose man). Topics include:

- Requirements for safe high pressure waterblasting
- Proper job set up
- Pipe Cleaning
- Tube Cleaning
- Drain Cleaning
- Stiff Lancing
- 'Shotgun' cleaning
- How to Select an effective tip
- Job performance issues
- Job breakdown.

The advanced class builds on the skills and knowledge obtained in the Fundamentals class. Topics include:

- Review of Waterblast Safety
- Waterblast Theory and Application
- Evaluation of Job Situations and Solutions for the Technician
- Capabilities and Applications for Waterblast Accessories
- Introduction to Waterblasting Units for the Operator Trainee
- Field Training and Evaluation of Learned Skills

In both classes, time will be split between the classroom and 'hands-on' experience with high pressure units, their safety devices and accessories using FS Solutions 'Simulator'.

Toledo, OH Dates: August 23-27, 2010. Location: FS Solutions Toledo Ohio Center.
